#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

This application contains claims directed to the following patentably distinct species of the claimed invention: The species of figures 1-5, the species of figure 6 and the species of figures 7-8. A telephone call was made to John Egbert on 09/22/2005 to request an oral election to the above restriction requirement and resulted in an election without traverse of the embodiment of figures 1-5. Currently, claim 1 is generic. Claims 1-2 read on the species of figures 1-5.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 2875

Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Tsai. Tsai discloses a cluster lamp comprising a mounting base and a plurality of illumination tubes (10) which are adjustably fastened with the mounting base (203 and 204) by a fastening structure such that the illumination tubes (10) are arranged in a cluster (see figure 2); wherein said fastening structure comprises a plurality of first pivoting seats (201), and a plurality of second pivoting seats (202) corresponding in number to said first pivoting seats, each of said first pivoting seats (201) being fastened with one end (101) of each of the illumination tubes, said second pivoting seats (202) being fastened at intervals with the mounting base whereby said first pivoting seats (201) of the illumination tubes (10) are engaged with said second pivoting seats (202) of the mounting base (203 and 204).

#### ***Allowable Subject Matter***

2. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McGee discloses a pivotable lamp tube similar to applicant's invention.

Art Unit: 2875

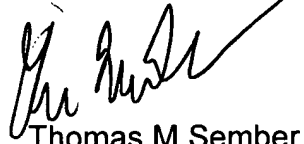

**Reasons for Allowance:** The prior art references of Chang and Bremer disclose toothed pivoting assemblies similar to applicant's invention. However, none of the references teach modifying the specific claimed cluster lamp illumination tube pivoting assemblies of Tsai to further include "the first pivoting seats are comprised of a first toothed edge; wherein said second pivoting seats are comprised of a second toothed edge engageable with said first toothed edge; wherein each of said first pivoting seats and each of said second pivoting seats are pivoted together by a pivot in conjunction with a spring such that said first toothed edge is engaged with said second toothed edge."
